

SUBJECT: Changing your dial-up phone number
PLATFORM: Windows XP

Open Networking Connections

1. Click on the **Start** button, then click on **Control Panel**.
2. In the new window, double-click on **Network Connections**.

If you can't see Network Connections then on the left-hand side, click Switch to Classic View.

Changing the Phone Number

Right-click on the **paradise** dialler, and then left-click on **Properties**.

Delete any entry in **Area Code** and delete the existing entry in **Phone number**.

In **Phone number**, type:

086 727 234

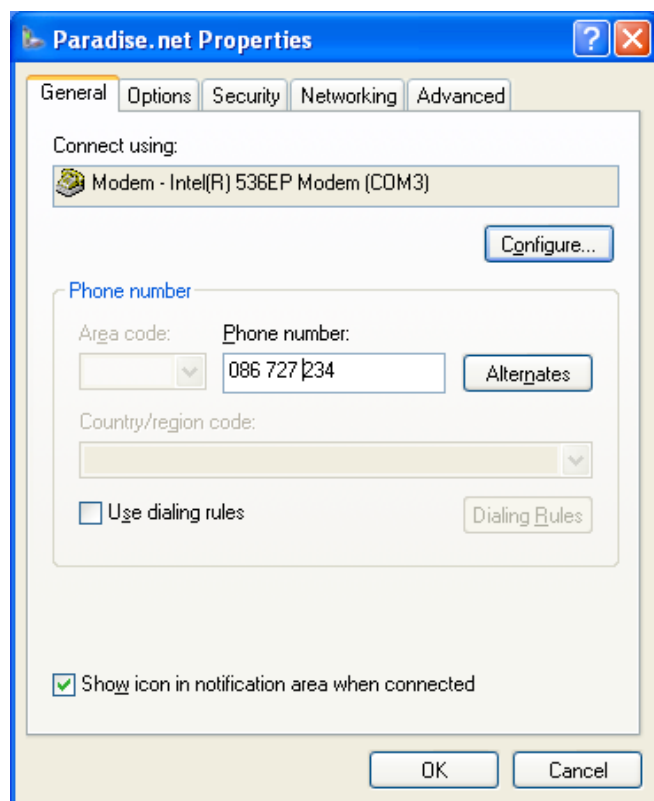

Ensure the **Use dialing rules** is not ticked.

Hot Tip! If you have Call Waiting and would like to disable it temporarily, then just prefix the number with either *52 (for Telecom) or #29 (if you are connecting from Wellington or Christchurch and your phone number starts with 9).

Click **OK** and close the **Network Connections** window.

Congratulations!

You have now changed your paradise.net dial-up number.
